# SERVICE

# BULLETIN

NUMBER 127

October 15, 1954

SUBJECT: Model PA-23 Airplane Flight Manual

MODELS AFFECTED: All Model PA-23 Airplanes'

The Airplane Flight Manual which is now a part of your airplane states under the Operating Procedures for the fuel system that the "Pressure Cross Feed shall be in the 'Off' position for take-offs and landings". It is requested that until fuel valve locks are installed you disregard your Flight Manual and Check List and that the Pressure Cross Feed be put in the "On" position for all take-offs and landings.

It is further requested that prior to take-off and landing, the Pilot's Check List be completely complied with and that all controls be checked to ascertain that they are in their proper positions.

End.

PIPER AIRCRAFT CORPORATION, LOCK HAVEN, PA., U. S. A.
